

UNITED STATES GOVERNMENT

Memorandum

TO : C/ASD

DATE: 25 February 1965

FROM : DAD/S&D

~~XXXXX~~ Appointment Time for Discussion: 26 February, 0900

I am anxious to see ASD take as much as possible of the SOD work. This looks like an initial foot in the door. Can we get together for about a half hour to discuss a possible approach here?

Rather than wait for somebody else to levy the requirements, I propose that we say that System XVI and/or System XVII should be considered as candidates for installation here; then play this against the Staff to see whether or not they concur in the requirement aspects of it.

So far as reference 1 is concerned, we need to determine what the requirements were that resulted in the solicitation or unsolicited submission of the proposal.
